

## TEN THOUSAND NET CLEARED ON 20 ACRE ORCHARD

Average of Over \$500 Per  
Acre Above All Expenses  
Profit for Roswell Men

Roswell, N. M., April 10.—A net profit of \$10,212.25 from their 20 acre orchard near Roswell, was made last year by Shearman and Johnson. This sum represents a clear profit above all expenses of over \$500 per acre. The orchard in question is a part of the big Hagerman orchard, recognized as one of the finest in the Texas valley. Shearman and Johnson shipped from their orchard in 1913, 12,007 boxes of apples for which they received \$13,366.66. From the bulk apples they shipped \$251.51 was received and from apples stored in this city at the close of the shipping season they received \$187.50, making a grand total of \$13,424.64 net, after the cost of freight and commissions for handling were deducted.

## Most Skin Trouble Readily Overcome

The Active Principle of a  
Famous Remedy Works  
Wonders.

Many people have marveled the way S. S. S. overcomes skin troubles. The explanation is the fact that S. S. S. works in the blood and the blood is really the most intricate and extraordinary mass of arteries and veins.

When you come to realize that the skin and the flesh beneath are composed of a network of tiny blood vessels you solve the mystery.

There are wonderful medicinal properties in S. S. S. that follow the course of the blood stream just as naturally as the most nourishing food elements.

It is really a remarkable remedy. It cleanses and improves the entire system of which is to stimulate the blood to the healthy selection of its own essential nutrients. And the medicinal elements of this medicine blood purifier are just as essential to well-balanced health as the nutritional elements of the meats, grains, fats and sugars of our daily food.

Nor can drop of minerals or drugs be used in its preparation. Ask for S. S. S. and just insist upon having it. And if you desire a full and complete cure, insist upon the original S. S. S. made in the Medical Department, The Scott-Schell Co., 1225 South Main, Atlanta, Ga.

Do not allow some zealous clerk's eloquence over something "just as good" as S. S. S. to fool you with the name of mineral drugs. Beware of all substitutes. Insist upon S. S. S.

## MY TIRED FEET ACHED FOR "TIZ"

Let your sore, swollen,  
sweaty feet spread out in  
a bath of "TIZ."

Just couldn't  
wait to take  
my bath!

Just take your shoes off and then put those weary, shoe-crinkled, aching, burning, corn-riddled, bunion-tortured feet of yours in the "TIZ" bath. Your toes will wriggle with joy; they'll look up at you and almost talk and then they'll take another dive in that "TIZ" bath.

When your feet feel like lumps of lead—all tired out—just try "TIZ." Its grand—its glorious—your feet will dance with joy; also you will find all pain gone from corns, callouses and bunions.

There's nothing like "TIZ." It's the only remedy that draws out all the poisonous exudations which puff up your feet and cause foot torture. Get a 25-cent box of "TIZ" at any drug or department store—don't wait. Ah! how glad your feet get; how comfortable your shoes feel. You can wear shoes a size smaller if you desire—Advertisement.

## EASY TO DARKEN YOUR GRAY HAIR

You can Bring Back Color  
and Lustre with Sage  
Tea and Sulphur.

When you darken your hair with Sage Tea and Sulphur, no one can tell because it's done so naturally, so evenly. Preparing this mixture, though, at home is messy and troublesome. For 50 cents you can buy at any drug store the ready-to-use tonic called "Witch's Sage and Sulphur Hair Remedy." You just dampen a sponge or soft brush with it and draw this through your hair, morning after morning, and at a time. By morning all gray hair disappears, and after another application or two, your hair becomes beautifully darkened, glossy and luxuriant. You will also discover dandruff is gone and hair has stopped falling.

Gray, faded hair, though no disgrace, is a sign of old age, and as we all desire a youthful and attractive appearance, get busy at once with "Witch's Sage and Sulphur" and look years younger.—Advertisement.

## WORLD TEACH AGRICULTURE IN PHOENIX SCHOOL

Maricopa County School  
Trustees to Consider  
Matter April 18.

Phoenix, Ariz., April 10.—Plans for the institution of a course in agriculture at the Phoenix high school will be made April 18, at the second annual meeting of the Maricopa county school trustees. Agriculture is already taught at the Mesa high school and Tempe normal. Heretofore lack of funds has prevented scientific farming being added to the curriculum at Phoenix.

The passage by congress of the Lever bill providing for agricultural courses in public schools resulted in the annual appropriation of \$10,000 for Arizona. Out of that sum enough will be set aside to send a supervisor from the university of Arizona to take charge of agricultural instruction in the schools of Maricopa county.

Another matter to be discussed at the convention April 18, which will be held in the Phoenix high school auditorium, is the formation of a central purchasing board to buy supplies for all schools in the county. At present each board of trustees buys supplies and it is claimed that a single board could effect a great saving.

**TRUCK FARMING IS  
POPULAR AT CUTTER**  
Cutter, N. M., April 10.—Truck farming is becoming popular around Cutter and this season the various tracts in the vicinity are being planted to garden truck. Much of the stuff raised will be sold to the Elmhurst Hotel. The mild winter has encouraged many to try truck gardening and fruit raising.

Robert W. Ward has set out three acres of two year old Ben Davis apple trees and also a large patch of berry plants on his ranch five miles from here.

H. A. Yost has set out a number of mixed trees, such as peach, pear, plum and apricot, and has also put in a good sized vineyard.

W. H. Weston has set out two acres in fruit trees and two acres in strawberry plants, and the ever bearing plants have never been tried in this vicinity before.

George Shultz has set out a lot of new trees as well as a large truck garden.

John Latham, living just east of town, has planted a large tract to beans and is also putting in a small orchard and vineyard.

The fruit at the Graham ranch has so far withstood all cold winds and Mrs. Graham predicts a record breaking yield if the Easter cold is not too severe.

A thousand strawberry plants have been ordered for the Chamberlain ranch south of here.

## WILL TRY INDIANS AS COTTON PICKERS

Tucson, Ariz., April 10.—An experiment will be made this year to determine the efficiency of Indian labor in picking cotton. The Indians are being tried also as laborers in the fruit raising industry.

The Papago tribe are the most numerous tribe in this vicinity and are docile and industrious by nature. It is believed that they will make efficient workers.

Egyptian cotton did so well experimentally last season that this year are being planted by one company alone. A gin is now being built. The cultivation of this crop promises to treble year by year. Arizona is one of the few places in the United States where it can be grown. Its long staple brings double the price that the short staple cotton of the south does.

The crop need not fear drought, for it is watered by irrigation. Nor has it to fear floods.

## TEXAS FRUIT CROP IS CUT SHORT BY COLD

Austin, Tex., April 10.—Deposits received by commissioner of agriculture Ed R. Kone on the condition and prospects of the fruit crop in different sections of Texas indicate a good crop. While the yield will not be as large as in former years, the quality and size of the fruit and the higher price it will command will more than offset the decreased yield, he says. This is especially true of the peach crop.

"The peach crop, as a whole, will run not less than one-fourth of normal," said commissioner Kone. "It is owing to the thinning done by frost, the fruit will be uncommonly large and fine, and the crop will weigh almost as much as much as the bumper crops of the past and bring growers as much money, with less labor."

## SAN SIMON VALLEY WELLS NEED CASING

Yavapai, Ariz., April 10.—It has been discovered that wells in the San Simon valley, the permanent water, are being bored larger, often being 48 inches in diameter.

All public lands in this valley are to be provided with sidewalks of iron piping in the washes, to conform to the requirements of the water department for the establishment of rural mail routes.

Dr. J. R. Kight, who has two ranches in the valley has completed irrigation ditches and laterals and will cultivate 90 acres, 50 of the tract in alfalfa.

## CHILE CULTURE IMPORTANT ONE IN NEW MEXICO

It Has Been Grown in Older  
Agricultural Districts of  
State for Many Years.

State College, N. M., April 10.—Prof. Fabian Garcia, expert in charge of the experiment station of the New Mexico College of Agriculture and Mechanical Arts, has issued an important press bulletin on the subject of "Chile or pepper culture."

The chile plant is well suited to New Mexico conditions. It has been grown in some of the older districts for many years, and has been, and is a very important crop to a large percent of the New Mexico population. In former years it has been, and is being, shipped into the state, due to a disease which has attacked the plants and reduced the crop very materially. While this plant has been grown in the state for a long time, there had not, until recently, been any effort made to improve the varieties. Six years ago the experiment station undertook an experiment with this crop, to improve the varieties.

**Big Yield Possible.**  
Under good care, on good soil and a good stand, an acre may produce as high as 15,000 pounds of green chile, while last season some of the strains in the test produced at the rate of over 8000 pounds of fresh ripe chile per acre. Upon drying, this was reduced to slightly over 2100 pounds, or to about 25 percent. In other words, there was about three-fourths of the weight of the fresh ripe chile water. Two thousand pounds of dried ripe chile may be considered a good yield. Particularly so if the price of this product remains as it has been during the last few years, at 10 to 15 cents a pound, whole.

## REEVES FARMERS TO PLANT COTTON

Large Acreage Will Be Put In This  
Year in the Country Around Pecos;  
Barstow Farmers Plant Cotton.

Pecos, Tex., April 10.—Reeves county farmers are already busy planting cotton and the indications are that a greatly increased acreage will be put in this year.

R. N. Sewell, whose farm is on the Reeves Independent canal, has arranged to plant 300 acres in cotton and will begin planting this week.

L. Cooper, who has a farm in the same neighborhood, also plans planting cotton shortly.

Farmers around Barstow also are to put in good cotton acreages this year. Mr. Montgomery, a Barstow farmer, was here this week and said he is having his land plowed to put in a big cotton crop.

## ARIZONA INDUSTRIAL SCHOOL MAY GROW ENGLISH WALNUTS

Phoenix, Ariz., April 10.—English walnuts may soon be one of the products of the state industrial school farm, at Fort Grant. The board of control is planning to have the school grow English walnuts on about 150 fine old black walnut trees around the fort. The experiments of C. C. Blederman, a farmer in the Huachuca mountains of Cochise county, have proved that this can be done. Mr. Blederman may be asked to direct the budding operations at the school.

The budding is not to be done, however, till some 25 acres of the school farm has been fenced. The board is now trying to find \$100 that can be used for that purpose.

## NEW ALPINE CROP WILL MOVE IN NEXT TWO WEEKS

Phoenix, Ariz., April 10.—The first of this year's alfalfa crop will begin to move within the next two weeks, the first shipments coming from the lower valley to the market.

About the first of May the crop around Roswell will begin coming in. It is expected there will be more hay this season in the Pecos valley than ever before. The average alfalfa crop moved out of the valley is 4000 cars.

## MANY VARIETIES OF COTTON PLANTED AS AN EXPERIMENT

Tempe, Ariz., April 10.—All known varieties of Egyptian cotton are now planted on the Tempe Normal school farm this year, to determine which is the best adapted to Salt River valley conditions. The experiments are to be made under the direction of Prof. J. R. Griffith.

## HATS FOR EASTER

All the new shades  
with the latest bands  
are here, 10 very  
new and distinct  
styles just opened.

## GLR FARMERS PLAN TO PROTEST WATER INTEREST

Form Water Users' Association;  
Seek to Establish  
Priority Rights.

Safford, Ariz., April 10.—Plans for the organization of a water users' association were made at a mass meeting of farmers held here. The farmers also are seeking to establish their priority and future rights in the use and impounding of water from the Gila river before the San Carlos project assumes definite shape.

The meeting did not resolve itself into a protest against the building of the proposed San Carlos dam, which would bring under cultivation some 50,000 acres of land in the Casa Grande valley far down the Gila from here. Farmers here had been led to fear, however, that the building of the San Carlos dam might endanger their water supply unless their prior claims to the river flow were first definitely established.

Telegrams from Washington, lately received, said that the federal government stated that no hasty action will be taken regarding the building of the dam; that it will await the results of the but not before the priority rights of the upper Gila valley farmers are fully established.

## BEGIN CELEBRATION OF PASSOVER FEAST

In the Hebrew households of this city and throughout the world the celebration of the "Feast of the Passover," or "Pesach," will begin this evening. Pesach is the spring festival of Judaism, as Easter is that of Christianity, and serves to commemorate Jehovah's deliverance of the children of Israel from their bondage in Egypt, which was accomplished through the great leader and lawgiver, Moses. Pesach is one of the three great feasts of the Jews, and in ancient times they journeyed from all over Palestine to Jerusalem to take part in the religious services at the temple.

The feast of the Passover lasts eight days. The first two and the last two days of this period are held holy by the orthodox followers of Judaism, and are marked by the repetition of ancient rites in the synagogues. This evening the seder service will usher in the celebration. After the ceremonies in the synagogues the members of each Jewish family gather about the dining table, on which is placed a part of a shankbone of a lamb, roasted which is symbolic of the Paschal lamb offering, and also a mixture of fruits and nuts, chopped, which represents the mortar which the Jews used in their enforced labor for the Egyptian Pharaohs. There is also a jar of vinegar and the bitter loss of horseradish leaves symbolic of the bitterness of the oppression to which the Israelites were subjected. Cups of wine are at each place. The head of the family recites the Kaddish, or the sanctification of the festival, as the wine is consumed. Then the Haggadah, a history of the providential deliverance of the Jews, is read and chanted, and the evening meal follows.

Throughout the festival the eating of bread containing leaven is prohibited, and in the place of bread unleavened cakes called matzo, made of flour and water without yeast, are eaten. This custom is due to the fact that in their hasty departure from Egypt the women of the Israelites had no time to bake leavened bread. This part of the observance causes the Passover to be called also the "Feast of Unleavened Bread."

## RECEIVES NEWS OF DEATH OF A REMARKABLE WOMAN

Mrs. R. P. March, of El Paso, has received news from Dallas of the death of her granddaughter, Mrs. Norma Caroline Knight, at the age of 91 years, seven months and six days. Her death occurred Monday morning. Her husband, Mr. R. P. March, was a prominent citizen of El Paso. She was the mother of 12 children; reared five stepchildren; gave a home to three orphaned girls and brought up 10 grandchildren. She was one of the earliest settlers in Dallas county, living there 58 years and for 45 years she was a widow. She left 191 descendants, among them 28 great-grandchildren.

## LEADING CITIZENS TO TELL OF SEIZURE OF BALLOTS

Pana, Ill., April 10.—Leading citizens of Pana township were today summoned to appear before the grand jury and tell what they know of the holding of town clerk Walter Lester, early Tuesday morning.

Constitutional testimony regarding the seizure of 3000 blank ballots from Lester may be given.

Liquor dealers here declare they will contest the election. They charge that the whole proceeding Tuesday was a travesty on the election laws.

## Our Spring Style Shown For Men and Young Men Is Now at Its Best Bright, New and Beautiful Styles

The road to economy and good dressing leads to this store. Come in and see how different "Fashion" Clothes are from what you find at the ordinary stores. See how different they are in style, fit, quality and workmanship and see what great values they are for the price. This difference is worth seeing and we would like to show them—Come in.

Great spring showing of New Hats, New Shoes, Beautiful Shirts, Gorgeous Neckwear, New Hosiery, Underwear and everything else in the way of Dress for men.
